Aptitude™ 470DBL Two-Student Open Front Desk Specifications

Frame/Bookbox: Self-standing with built-in 18-gauge steel bookbox. 1-1/4" diameter, 18-gauge leg uppers form the corners of the book compartment for added strength and ease of cleaning. The leg uppers are mig welded to the bookbox and a 5/8" U-Brace is welded to all four legs. 5-1/4"x42"x16-1/2" extra-large divided bookbox with safety edge and stamped pencil trays. Minimum 14" of total weld. Frame is texture powder-coated after all welding is complete. Textured Powdercoat to hide fingerprints and greater wear resistance.

Frame/Bookbox Colors: Available in standard Textured Black and Textured Titanium. Optional Textured Navy and Textured Sand. Textured powdercoating hides fingerprints and improves surface wear life.

Inserts: 1.110" diameter, 16-gauge nickel/chrome plated tubing with punched holes to receive adjusting screws. Leg adjustment uses self-tapping locking screws which pass completely through both upper leg and lower insert. Dual-bolt attachment at 1" increments.

Chrome Inserts: .86" diameter, nickel/chrome plated 16ga tubing with punched holes to receive adjusting screws. Leg adjustment uses self-tapping locking screws which pass completely through both upper leg and lower insert. Chrome is comprised of metal layers (Nickel & Chromium) electrostatically bonded to metal. Our standard is 4-6 mills (25%-50% more than our competitors) of Nickel—it will not scratch.

Glide System: Glide attachment will be a standard internal gripping spring steel

umbrella at least 5/8" diameter or larger. The glide will have a ferrule. Glide casing and ferrule shall be constructed of durable case hardened steel; no plastic. The glide will be of full swivel design, silent and firm fitting for positive attachment and retention. All glides must make full level contact with the floor and the maximum swivel angle of the glide shall not be violated. Incorporating our exclusive glide button system available in either nylon, neophrene, steel, or wool felt bottom. Pick the right base for the floor surface. Snap on a new base for surface change or wear replacement.

Laminate Top: Three-ply construction. 24"x48"x1-1/8" High pressure laminate and backer are 'fused' to the wood core base using a glue web formulation that is clean, environmentally safe, extremely consistent. 3/8" bull-nosed bumper edging that is mechanically fastened every 6 to 8 inches. Top is attached using self-tapping screws into fourteen uniformly drilled holes. No pencil groove.

Laminate: Any color that is a Wilsonart™ standard is available.
