

12-Station Wireless Listening Center

with Wireless Multi-Channeled Transmitter and Headphones

LCP/12/901

The HamiltonBuhl LCP/12/901 lets you go wireless in your classroom with plug and play simplicity.

Connect the wireless transmitter to any analog audio source through 1/8" stereo mini plug and transmitter audio via dedicated FM signal up to 300 feet, to a nearly unlimited number of wireless headphones.

With 4 different color-coded frequencies, you can easily switch between them; with additional transmitters you can have up to 4 different channels of audio broadcasting simultaneously!

You'll get everything you need with this system, including one wireless transmitter, 12 wireless headphones, two AC Power Adapter, two 6-way charging cables and a lockable case to carry and store your listening center. It's the perfect solution for all multimedia labs and classrooms!

Note: A single AC Power Adapter is only capable of charging 6 wireless headphones at one time. Do not combine two 6-way charging cables with one AC Cord.

W900-Multi Specifications
