

CHARGING CARTS

24 TABLET/CHROMEBOOK CHARGING CART

Never fall victim to drained batteries again with Luxor's LLTM24-B. This slender charging station conserves space while protecting your tablets and Chromebooks in both transit and overnight storage. Two 12-outlet power strips readily charge devices when not in use, and the outside cord is easily managed by cable wrap hooks. When the cart is parked using its two locking brakes, take advantage of the rubber padded top for additional work or presentation space. Assembly is simple, only attaching the casters and guiding handle. Equip your school, business, or hospital with this charging cart to manage your IT needs.
