

A R I A

Low Profile Glassboards

Function Meets Elegance with Aria

Aria Low Profile Glassboards achieve the look of weightless, floating glass with the absence of visible hanging hardware or stand-offs, allowing the beauty of the glass to complement any décor. Our team of engineers developed a hanging system that promotes security and confidence that the board will not bow, strain, or move from the wall. Available in portrait or landscape formats, Aria will fit any space to optimize brainstorming and collaboration.

Aesthetic

1/4" tempered safety glass with concealed hanging hardware floats just 1/2" off the wall, creating a clean, uncluttered look.

Possibilities

Standard sizes up to 4' x 10', standard colors, patterns, or the option to add logos, mount the board in portrait or landscape, or use multiple boards to create a glass wall.

Functional

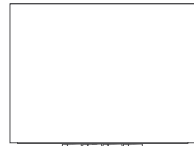

Available in both magnetic and non-magnetic finishes with square corners, create a clean, easy-to-use canvas for your ideas.

Integrated

Cleating and a steel support bar work together to secure the glassboard to the wall as well as keeping magnetic accessories within reach and the surface clutter free.
